

HESHAM ALSADAN

DATA SCIENTIST & AI

• Riyadh, • 966-507-050-338 • HeshamAlsadan@gmail.com • [Portfolio](#)

WORK EXPERIENCE

Data Scientist and AI Engineer passionate about building advanced EdTech projects. Backed by 1,500+ hours of intensive training (100% attendance) at KAUST, SDAIA, Tuwaiq, and SDA. I have hands-on experience creating AI solutions for the education sector, with strong skills in AI, Data Science, Python, IoT, Cloud, and GPU infrastructure.

Tasar'u — GPU Engineering Bootcamp | تسارُع

Jun 2026 - Present

- 8 intensive weeks covering LLMs, Transformers, agentic AI, GPU architecture, CUDA, PyTorch, distributed training, fine-tuning, and production inference at scale.

SDA — Software Development using Python Bootcamp

May 2026 - Jun 2026

- Completed a 7-week intensive journey in software development using Python, FastAPI, React, and PostgreSQL, building practical programming skills and real-world application experience.

KAUST — Advanced Artificial Intelligence

Jan 2026 - Feb 2026

- 80+ hours of advanced training in AI techniques, models, and applications.

Tuwaiq Academy : Web Development Bootcamp Trainee

Jun 2025 - Aug 2025

- Completed 300 hours of intensive training in Python and full-stack web development, with a focus on Django and modern web technologies.

Tuwaiq Academy : AI Bootcamp Trainee

Sep 2024 - Oct 2024

- Completed 200 hours of intensive training at Tuwaiq Academy, gaining hands-on experience in AI, machine learning, and deep learning.
- [Capstone Project](#)/ AI Focus Analyzer for E-Learning:
- Developed an AI platform to analyze student focus during e-learning using facial recognition and quiz performance.
- Tools used: MediaPipe, OpenAI GPT-3.5, Whisper, Streamlit.

SDAIA: Data Science and AI T5 Bootcamp Trainee

Mar 2024 - Jun 2024

- Completed 360 hours of intensive training, covering SQL, Python, data analysis, machine learning, deep learning (CNN, RNN), and MLOps.
- [Capstone Project](#)/ Hadir: Management Attendance System:
- Developed an automated student attendance system using facial recognition. The system classifies student images into folders and records attendance as students enter the classroom.
- Tools used: YOLO, Keras, Roboflow.

Tuwaiq Academy : Data Science and Machine Learning Bootcamp Trainee

- Completed 200 hours of intensive training, building 5 projects and 50 labs using Python, TensorFlow, Tableau, and TensorFlow. Gained expertise in machine learning (SVM, Decision Tree, Random Forest) and deep learning (CNNs).
- [Capstone Project](#)/ Haraf: Your Farming Companion:
- Built from scratch, this CNN-based image classification project identifies date types, maturity, grades, and palm tree diseases.
- Tools used: Python, TensorFlow, Plotly Dash.

EDUCATION

Bachelor's Degree in Computer Science
King Saud University

additional information

- Certifications: Alibaba Cloud Computing Engineer | IoT Certified | Drones
- Programming Languages: Python, SQL, JavaScript
- Languages: Arabic, English
- ML/DL Frameworks: Keras, Scikit-learn, TensorFlow, MediaPipe, Django
- Tools & Technologies: Streamlit, Roboflow, Kaggle, Cloud Computing, Power BI
- Core Competencies: Data Analysis, Deep Learning, Problem Solving, Teamwork, Leadership
